CARBON LOSES TO ACME CLUB

The representatives of the Carbon Lawn Tennis Club journeyed to Acme on July 19th to play the return match with the Acme Club. Acme won by four events to three, after a closely contested match. Carbon had defeated Acme on May 10th at Carbon, by four events to three, so honors are divided.

After the match the Acme Club entertained the visitors to a banquet in the Club Room on the Acme Sports Grounds, and the usual after dinner speeches brought a very enjoyable day to a close.

The following are the results and scores:

Men's Singles—W. Edwards of Carbon defeated J. Taylor of Acme, 6-0, 6-3. C. Smith of Acme defeated B. Ramsay of Carbon 0-6, 6-4, 8-6.

Ladies' Singles—Miss W. Fowler of Acme defeated Miss N. Hemmings of Carbon 6-3, 6-2.

Men's Doubles—L. Poxon and W. Edwards of Carbon defeated J. W. Donald and G.M. Levell of Acme 6-4, 6-5. J. Taylor and C. Smith of Acme defeated V. Hawkins and W. Poxon of Carbon 6-1, 6-2.

Ladies' Doubles—Miss P. Fowler and Miss D. Hotsenpillar of Acme defeated Miss M. Ramsay and Miss N. Hemmings of Carbon 6-3, 2-6, 6-1.

Mixed Doubles—B. Ramsay and Miss M. Ramsay of Carbon defeated G. Levell and Miss Hotsenpillar of Acme 6-1, 6-4.

The Carbon Club has not been able to get very much practice since June 17th, when the courts were destroyed by the flood waters. Two courts have now been fixed up, and the other two will be finished this week, so tennis will no doubt be very much in evidence in Carbon during the remainder of the summer. There are several other matches in prospect.

BANK OF MONTREAL CROP REPORT

General—General showers in all of the three prairie provinces have been beneficial during the past week and the condition of crops and pastures now show improvement on the whole, except in those large areas in Saskatchewan and parts of Manitoba, where the crops were destroyed by drought. In all the other provinces in Canada, both East and West of the prairies the highly favorable outlook in regard to practically all crops continues.

Northeastern Alberta—Growing conditions are suitable and 65 per cent of the wheat is headed.

Southeastern Alberta—Wheat is approximately eighteen inches high and practically all headed.

Western Alberta—Conditions are favorable and about 60 per cent of the wheat is headed. Coarse grains are late and in most cases will produce feed only. In the northern and central parts of this area an average crop is expected but in the Lethbridge district further rain is required. The sugar beet crop is making good progress.

New Lakeside Inn is Opened

Beautifully set in one of the most picturesque sections of Nova Scotia, combining marine and landscape vistas which bid fair to bring it fast into line of popularity with its sisters at Digby and Kentville, the new Lakeside Inn, at Yarmouth, N.S., was formally opened on June 16, as the newest link in the Canadian Pacific Railway's great chain of hostelryes from Atlantic to Pacific. Readily accessible from Saint John, through Digby, via the

luxurious steamer "Princess Helene"; from Halifax, over the Dominion Atlantic Railway; and direct from New York, Boston and Portland by Eastern Steamship Lines, the town of Yarmouth and its new hotel are destined to play an important role in tourist traffic to Nova Scotia, with its famed Annapolis Valley and historic Land of Evangeline. Sport and recreations are plentiful and varied. Canoeing, tennis, fishing, swimming and innumerable at-

tractive excursions are only a few of the offerings. There is good golf available near Yarmouth and the hotel and its cottages form a comfortable base of operations. Taste and comfort have been skillfully combined in its spacious public rooms, broad verandahs and airy bedrooms. Its cuisine and service are conducted on the established standards, known to guests of the company throughout Canada.

POOL REPAYMENTS TO GOVERNMENTS TO BE SPREAD OVER 20 YEARS

Repayment of Canada wheat pool indebtedness will be made out of the earnings of the three provincial pool elevator systems.

Provincial pool elevator systems will continue to function in Manitoba, Saskatchewan and Alberta as the property of the provincial wheat pools.

Announcement of the basis of operation in each province will be made shortly by Saskatchewan and Alberta pools, while a committee representative of the three prairie governments and the pools will work out a method of selling wheat. The Manitoba pool has already announced that it will operate on an optional open market policy.

Creation of an interprovincial trading corporation is left in the hands of a committee consisting of three provincial government representatives and three other representatives of the pool elevator systems of Saskatchewan, Alberta and Manitoba.

Such are the four points of Canada wheat pool organization and fiscal policy decided by Premier J. T. M. Anderson of Saskatchewan, Premier John Bracken of Manitoba and Premier J. E. Brownlee of Alberta at the conclusion of a two day conference at Regina last Friday.

Repayment of the Canada wheat pool's 1929 indebtedness to the provincial governments, spread over a period of 20 years, will be made out of earnings of the elevator systems, under a fiscal policy "which will present no obstacle whatsoever to the operation of the elevator facilities of the three provincial pools."

"What do women talk about when they get together?"

"Just what men talk about."

"Aren't they terrible?"

ALBERTA NEWS

E. Forster Brown, secretary treasurer of the town of Macleod completed his twenty-fifth year in the service of the town of Macleod at the end of June.

A disastrous hail storm swept over a wide territory south of Youngstown on Friday last, wiping out crops over an estimated area of eight or ten miles wide.

Over 300 homesteaders bivouaced in Bonnyville on the opening of the land office and many were on the doorstep all night reminding one of the Oliver Land Bill that came into operation in 1908.—St. Paul Journal

According to reports around Basano, the best crops in that district will average between 15 and 20 bushels to the acre.

The Alberta Government Telephone reports that June collections this year were below that of June 1930. Toll traffic also showed a decline.

The Hanna district has received nearly two inches of rainfall since the first day of July.

The Imperial Tobacco Company has presented the Drumheller Arena with a time clock, and next winter hockey fans can watch the minutes of play as they go by, and know how much longer a period or game will last.

The lake formed recently in connection with the Gleichen irrigation system provides an excellent place for the citizens to spend these hot afternoons.

The Imperial Chataqua will be held in Acme on July 21-22 and 23.

James Cassidy, said by police to be "the Kid" in the famous Midwinter murder case, is still unfit for trial, following his operation recently for appendicitis.

At "Treasure Island" Great Bear Lake Alberta, "mystery" ore has been found and assayed at \$1035 a ton. The discoverer of the island with its fabulously rich silver outcroppings, is a Detroit geophysicist, who is now in Ottawa submitting his samples to the Department of Mines.

In the band competitions at Calgary last week, Stettler band won the first place; Vulcan second, and High River third. Bellevue and Hanna received honorable mention. This was the third win for Stettler.

W. Hobson of Rosedale won the major event at the annual tournament of the Drumheller Golf and Country Club.

HAVE YOU PAID YOUR SUBSCRIPTION YET? NOW IS THE TIME

AUTO LICENSES ISSUED TO DATE NUMBER OVER 84,000

Approximately 84,000 motor car licenses were issued by the provincial secretary's department for the first half of the year. Up to June 30 there has been about 73,000 passenger cars and 11,000 trucks thus accounted for, making a total comparing remarkably well, conditions considered, with the corresponding period of last year.

It is expected that the total for 1931 will come close to the 100,000 mark, though there has naturally been some decrease in the first half of the year. The total figures for 1930 were 100,135 made up of 85,067 passenger cars and 15,068 trucks.

In explanation of such drop as there has been to date, it is pointed out that a quite large number of farmers in different parts of the province, who ordinarily operate a passenger auto and a truck each, are this year operating the truck only, making it serve a dual purpose. This, of course, is an economy measure, which is reflected in the net issue of licenses.

Half price on motor licenses goes into effect this year at the beginning of August, a month earlier than last year, and it is expected that this will give fresh impetus to the demand. Cars that have been laid by for a temporary rest will be brought out again for the remainder of the season and in some cases the cost of the license will no doubt be charged up to holiday expenses.

YOUNG LAD SHOWS HORSEMANSHIP

A nine-year old lad named Ralph Wells, stole the glory of the Sixth Annual Field Day of the Jasper Park Rodeo and Turf Club, held there last week, and some of the hardest riding cowboys in the west were forced to bow before the superb horsemanship of the youngster. Young Wells' riding earned him the Kingsland Trophy, for the mile course, and the McDermid Cup, for the half-mile junior, 14.2 and under. His outstanding ride was in the free-for-all, when he was left at the post, but pulled his horse "Ruby" up fast to go through the entire field of half.

SWING BRIDGE NOW COMPLETE

The work of putting in the new swing bridge to the island was started last week by members of the government bridge crew, and after a week's work the structure was completed on Tuesday. The new bridge was built on the same lines as the old one, and is said to be approximately 130 ft. long and about four feet in width. The former bridge was strung across the creek directly in line with the street on the island. The new bridge, however, was put across from the street running past Dr. McFarlane's residence. The change of location was on account of the width of the creek at this point and the fact that the creek banks are higher at this point.

Snicklefritz ----

Daughter: But Dad, don't you believe that two can live as cheaply as one?

Father: I certainly do. Right now your mother and I are living as cheaply as you.

Son: Dad, what is bankruptcy?

Father: "Bankruptcy, my son, is when you put your money in your hip pocket and let your creditors take your coat."

L.G.—Well, my little man, and how would you like your hair cut?

Small Boy—"If you please, sir, just like father's, and don't forget the little round hole at the top where the head comes through."

Wife—"Dear, tomorrow is our wedding anniversary. Shall I kill the turkey?"

Hubby—"No, let him live. He didn't have anything to do with it."

Ex-Capitalist—Why, a lot us of had seats on the stock exchange a year ago and now look at us.

Farmer—Yes, and many of us had seats in our pants a year ago, and now—don't look at us.

Mrs. Nagger—It was a come-down for me when I married you.

Mr. Nagger—Yeah; everybody said I took you off the shelf.

"The man I marry," she declared, with a stamp of her foot "must be a hero."

"He will be," remarked the cautious bachelor.

First girl—He told me I was so interesting—so beautiful.

Second girl—And you will trust your self for life to a man who lays himself out to deceive you at the very beginning of your courtship?

PROMINENT EDITOR VISITS HIS CONTRIBUTORS

The many contributors in Western Canada to McLean's Magazine, a Toronto publication, are being visited this week by the editor-in-chief, H. Napier Moore. He is accompanied by Mrs. Moore and they will leave on July 23rd for Alaska.

fourteen and win by a length and a half.

PLYMOUTH BINDER TWINE

The Plymouth "Six Points" of superiority as featured below will save you money, by saving your time, your grain, and—maybe your temper. These six points are:

1. LENGTH—full length to the pound as guaranteed on tag.
2. STRENGTH—less breaking, less wasted time, less wasted grain.
3. EVENNESS—no thick or thin spots—no "grief."
4. SPECIAL WINDING—No tangling.
5. TREATED WITH INSECT REPELLENT—you can tell it by its smell.

MISTAKE-PROOF—printed ball—insures correct use.

Where Are We Astray?

Out of the present world depression good will eventually come. This prediction can be made with absolute confidence and certainty of fulfillment because lessons are being learned and the need for reforms being demonstrated which will force action resulting in the application of remedies.

But at the present moment if the question is asked: What reform is most imperative, what action should be first taken, there are almost as many answers as there are people. There is no agreement as to what has caused world conditions; there is even less agreement as to the course of action necessary to reach solutions and to prevent a recurrence of such depressions. Mankind in its world relationships must have violated some of the fundamental laws of Nature to have brought down upon itself such a world calamity, but, if so, no one appears to be able to put their finger on the spot and declare authoritatively: "There lies the trouble."

All of which leads to the thought and the question whether our much vaunted systems of education are not very much at fault in the very foundations upon which they are erected. Much thought is expended upon the devising of a curriculum, in the preparation of text books, in the academic training of teachers, and hundreds of millions of dollars are expended in school buildings and equipment of all kinds. This has been going on for generations, yet when a world condition develops such as we are now experiencing, and from which we all suffer, the thinking of the world is confused and muddled. Statesmen, economists, financiers, world leaders in all branches of industry, all are at sea; all running around in circles; one advancing this theory as a solution only to be met by another absolutely contrary theory. No one seems to stand on solid ground, able to advance a clear case or an incontrovertible argument.

What is the basic cause of all this confusion? Is it not to be found in the fact that in our educational methods we have failed to ground our people in a true knowledge and acceptance of the immutable laws of Nature, failed to teach people to think, and to think straight, with the result that the world has been devising and trying out all kinds of artificial man-made devices and experiments, many of them in open defiance of Nature's laws, instead of remaining true to those laws.

Have we not in our educational systems devoted time and energy on many frills; have we not emphasized a narrow, even boastful nationalism; have we not placed a premium on the so-called higher education and the securing of degrees too numerous to mention, but failed to educate men and women to really think, to accurately weigh and rightly gauge the verities of the world in which we live in the full light and knowledge of those laws of Nature, ignorance and violation of which mean suffering, loss and disaster?

To illustrate: Let any two men meet and begin a discussion of present day conditions, and where does the conversation lead them within a few minutes? They begin by discussing wheat, its price, the marketing of it, whether there is over-production or under-consumption, the effect of Russia's "Five-Year-Plan" on Canada and the world, and at once they are attempting a discussion in political economy. Possibly they start by talking ordinary partizan politics, and at once they are into a discussion of tariffs, Protection versus Free Trade, currency and banking, trade treaties, markets,—in a word, political economy. Or taxation is the subject. They are agreed it is excessive, but there agreement ends. One man favors this method of raising necessary revenues; the other has directly opposite views. Again it is political economy. Or possibly they begin a discussion of religious creeds or the racial origins, characteristics, and emigration of people,—and they land in political economy.

But how many understand political economy which is affecting every nation, every home, every life today? What have our schools really taught us about it? Practically speaking, nothing. It is left as a study for the limited few who reach the higher grades, the colleges and universities, and even then it is the odd one who obtains more than a hazy idea of it.

Notwithstanding this universal ignorance of even the primary principles of the subject, we are today all talking, or attempting to discuss, political economy. The present depression has made it the current topic of conversation, the language of the street, the office and the home. And what do we know about it? How profoundly ignorant we are. And because of this universal ignorance, every quack proposal, every quixotic idea, gets a hearing, and in various quarters acceptance as a cure-all for our troubles.

The question presents itself: Should the study of political economy not be made the most fundamental of all studies for the youth of today, commencing early in the lower grades and continuing through our educational system? Let us study the verities of life; above all let us teach and train the coming generation along more practical lines, and, instead of striving to cram a vast amount of information on certain given subjects into their young minds, ground them in the truth and beauty of Nature and Nature's laws and then train them to think for themselves and apply those laws in every activity of life, individually, nationally, internationally.

Famous Estate For Sale

Glencoe, Lord Strathcona's famous estate in Scotland, is for sale. It covers more than 75 miles, its boundaries stretching 22 miles from Loch Leven to Rannoch. Glencoe was the scene of the 1692 massacre of the MacDonalds. The sentinel rock, from which the signal for the massacre was given, is on the property.

Vancouver Wheat Shipments

Wheat exported from Vancouver for the current crop year will exceed 70,000,000 bushels, according to estimates of the Vancouver Merchants' Exchange. For the present crop year to June 11, a total of 65,872,425 bushels were moved, compared with 43,917,181 bushels for the corresponding period a year ago.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die."

"My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again."

"My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Will Erect Seadromes

Trans-Atlantic Air Lines Soon To Be In Operation

The first of eight seadromes, proposed man-made islands to dot the Atlantic at intervals of 380 miles between the United States and Great Britain, will be constructed off the coast of United States next spring. Captain Hugh Duncan Grant, meteorological consultant to the promoters of the project, announced recently.

Grant, visiting in Akron, Ohio, predicted that within a year from the placing of the first seadrome the other seven ocean landing fields will be completed and a trans-Atlantic air line in operation.

The seadromes, Captain Grant explained, will have a six-acre deck, which will be 70 feet above the water surface, or 30 feet higher than storm waves. The seadromes will be buoyed by air tanks extending 40 feet below the surface. Ballistic tanks, filled with pig iron and giving the seadromes their stability, will extend 177 feet downward.

Australia's New Stamps

Unique Design Commemorates World Flights Of Kingsford-Smith

After some delay Australia has issued the Kingsford-Smith stamps to commemorate his world flights. The set consists of a two pence red, and a three pence blue. There is also a six pence deep mauve, issued for air mail service. Each of the three stamps have the same design, an aeroplane flying between the two hemispheres, with the inscription "Australia" at the top of the stamp, and "Kingsford-Smith's World Flights" at the bottom. The values are in small oval tablets in the lower corner, and the word "postage" at each side. The only difference in the air mail stamp is that instead of the words "postage" on each side, the words "Air Mail Service" are inscribed. When these Commemorative stamps were placed on sale in Melbourne the six penny air mail was bought so heavily, that the supply was exhausted within fifteen minutes.

An Unusual Convention

Four Hundred Diviners Of Water Attended Meeting In Italy

Four hundred diviners, including professors, physicians, priests, workmen and several women attended the first congress of rhabdomancy—divining of water, precious metals, etc.—at Verona, Italy, recently. In order to test the delegates' capacities, a commission of engineers dug nine holes ten feet deep in the municipal stadium and buried in them metals and pipes containing running water. Armed with rods, willow, or metal, the diviners discovered all the spots. Professor Mercati, of the Rome University, declared that he was so sensitive that he was obliged to wear rubber-soled shoes to avoid disturbing sensations when he was walking about.

Persian Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a peerless aid to lovely complexions. Used by men as an effective hair fixative or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

Plan Visit To Russia

Visas have been granted by the Soviet Government to George Bernard Shaw, Lady Nancy Astor, and a party of distinguished Britons who have announced their intention to visit Russia this summer.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Credit For Unemployed

Pending the commencement of unemployment relief works on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food, credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

A Spaniard introduced tobacco into Spain from the West Indies in 1559.

Penalty For Nude Paraders

Three Years' Imprisonment May Be Imposed Under Proposed Amendment

Three years' imprisonment for parading while nude may be imposed under an amendment to the criminal code which will be introduced in the House of Commons shortly by Hon. Hugh Guthrie, Minister of Justice.

The amendment is proposed with a view to putting a stop to nude parades by Doukhobors of western Canada. It is comprehensive in its character. In the first place it provides a penalty of three years on summary conviction for nude paraders. The same penalty may be imposed on anyone found nude in any public place, found nude on private property not their own, or found nude on their own property exposed to public view.

The term "nude" is defined in the amendment as being so scantily clad as to be indecent.

Utilize Muskeg Vegetation

Edmonton Firm Manufactures Building Insulator Material From Muskeg Litter

Commercial utilization of muskeg vegetation, plentiful enough in Northern Alberta, is seen as an immediate probability following the development of a new building insulator called "Mosstex" by two Edmonton men. An Edmonton lumberman, J. Victor Carlson, and his son Arthur V. Carlson, are stated by the Edmonton Journal to have perfected a process by which ordinary muskeg litter is transformed into fine quality of insulation material. Experimental work is stated to have advanced sufficiently for the new product to be offered to the building trade.

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

Willing To Oblige

A Philadelphia man called up a birdstore the other day and said: "Send me 30,000 cockroaches at once."
"What in heaven's name do you want with 30,000 cockroaches?"
"Well," replied the householder, "I am moving today and my lease says I must leave the premises here in exactly the same condition in which I found them."

British Trade With Russia

Export Credit To Be Extended For a Period Of 30 Months

In a move to increase British exports to Soviet Russia, the British Government announced Thursday, July 9, 1931, through William Graham, president of the Board of Trade, that exports credit will be extended for a period of 30 months instead of 24 months as at present.

This arrangement will be limited to heavy engineering products.

The British move has resulted from other European countries, notably Italy, having extended their export credit schemes for Russia to 30 months.

The announcement, made in the House of Commons, disposes of reports in the British press in the last few days that the Labor Government planned to extend a new credit of approximately \$30,000,000 to Russia. It was learned authoritatively that British exports credit arrangements for Russia remain unchanged except in relation to the extension of time limit. The 30-month limit includes the period of manufacture.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

A Live Stock Safeguard

Restrictions Placed On Importations Of Stock From Countries Infected With Foot and Mouth Disease

With official confirmation of outbreaks of the dread foot and mouth disease in England, Scotland and Ireland, it has become necessary for the Dominion Department of Agriculture to exercise the powers conferred upon it under and by virtue of the Animal Contagious Diseases Act, and cancel all permits issued for the importation of cattle, sheep, goats, and other ruminants, and swine from the countries infected with foot and mouth disease. While shipments actually embarked as on the date of the official order, June 20, 1931, will be allowed to proceed to Canadian points, the issue of permits has been held up for an indefinite period.

Brief Outline Of Regulations Governing The Admittance Of Tourists To Canada

An outline of Canadian regulations governing admittance of tourists may be of timely interest. A non-resident, visiting Canada for purposes of touring permit for his automobile for health or pleasure, may obtain a period not exceeding sixty days without bond, which may be extended for another thirty days on making application to any Collector or Sub-Collector of National Revenue, and satisfying him as to the bona fides of the applicant as a tourist. If the visitor desires to extend the period to six months he may do so by giving a bond.

Under revised regulations guns, rifles, fishing tackle, golf clubs, cameras, etc., previously used by a tourist, and brought in for his personal use and actually in his possession at the time of his arrival in Canada, together with dogs and other animals imported for hunting purposes or as pets, are admitted without deposit, the only requirement being that they should be reported at Customs on arrival at the frontier, in accordance with the regulations.

The term "cameras" includes not only still picture cameras, but motion picture outfits, the property of bona fide tourists, brought in for their own use for a temporary period, and not for any business or commercial purpose.

Canoes, outboard motors, tents, camp equipment, phonographs, radios, musical instruments, etc., brought in for a tourist's personal use, and not for gain or hire, are admissible upon a sum being deposited equivalent to the duty and taxes payable on the goods, each deposit being subject to refund upon identification and exportation of the articles under Customs supervision within six months from time of entry.

"Statements circulated in the United States that servants of American tourists and visitors to Canada are not being allowed to enter the Dominion this year are absolutely untrue," states Hon. W. A. Gordon, Canadian Minister of Immigration and Colonization. "American tourists and visitors have always been allowed to bring their servants into Canada and they may continue to do so. The only persons likely to find any difficulty in crossing the International Boundary are aliens who are in the United States illegally or in that country under temporary status, as the question of their re-admission to the United States would arise, should they try to return there."

Hon. Mr. Gordon said that Canada extends a cordial welcome to bona fide United States citizens coming to Canada as visitors and tourists, and Canadian Immigration officials at International Boundary points are instructed to facilitate their entry to the Dominion.

A Fallacious Opinion

The St. Thomas Times-Journal recently published a timely editorial pointing to the fallacious opinion held by so many people that the best of surgical attention and nursing care is found only in the largest cities of the continent. The St. Thomas paper puts in a word for the smaller hospitals like those in its own city, and also gives credit to the surgeons who are doing just as fine a work in their own small communities, as are the men of great reputations in the metropolitan centres.

"I have known you such a long time, and this is the first time you have ever danced with me."
"Yes. It is Lent, and I am denying myself pleasures."—Moustique Charleroi.

W. N. U. 1899

Ridiculed For Using Ancient Wooden Plough

But Farmers In Sussex, England, Know What They Are About

Although ploughs, like other agricultural implements, have been subject to many alterations and improvements in the course of centuries, it is remarkable at least that in some parts of England the most popular pattern of plough is still one which can differ but little in its general character from the very first implement of the kind that was ever invented. In Sussex and Kent, England, the old wheelless, turn-wrist plough is still very much in favour, and there is a very good reason for its popularity. On heavy land any sort of wheel except that of a wide and necessary cumbersome type cannot be of much service because it tends to dig into the ground when the soil is wet and causes the plough to "jump" when the surface is hard and dry. Sussex ploughs of this kind are invariably made of wood, there being practically no iron about them except the shoe on the tip of the share and the necessary nuts and bolts. The wooden share has the advantage on heavy land that it does not smear out the soil in the furrow like a wholly iron share, but tends to break it up. The Sussex farmer has often been held up to ridicule for his persistence in retaining the wooden plough, but we may take it that he knows what he is about.

Empire Marketing Is Becoming More Popular

Annual Report Of Board Shows Trade Is Increasing

The world-wide economic depression has not arrested the growing habit in the United Kingdom of buying within the Empire.

The annual report of the Empire Marketing Board reveals that apples from Canada and New Zealand reached a record quantity in the past year, those from Canada exceeding two million hundredweight, against a previous record of 1,869,000 hundredweight in 1923. In 1930, 64,000 hundredweight of Canadian pears were imported as compared with 60,000 in 1928.

Parliament has been asked to provide \$3,295,000 for the board's activities during the coming 12 months. The policy of making grants for scientific research work both here and abroad is being continued. Among grants already made are sums for the University of British Columbia for research on cheese ripening and research on the cost of transport of pedigree livestock; to the Ontario Agricultural College at Guelph in connection with egg production, and to the Newfoundland Government for fishery research.

"My husband and I attend to our budget every evening. It is more economical."

"How so, dear?"

"By the time we get it balanced it is too late to go anywhere."

A fire engine of German invention pumps streams of carbonic acid powder that smothers flames instead of using water.

(By Annette)

CAPE LENDS CHARM AND YOUTHFULNESS

You'll like this slender model immensely. It's a lovely patterned crepe silk in smart red and white colouring. The low placement of the circular skirt flounce joined to the upper part of the dress in diagonal outline gives the figure a charming lengthened line. The narrow tie-belt holds the dress snugly to the figure at the natural waistline. Being adjustable, it may be worn at a point as best suits its wearer.

The miniature view shows how utterly chic it is with cape collar. Lovely fabrics for its development are chiffon prints, pastel flat washable crepe, shirting silks, cotton mesh, and linen.

Style No. 829 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 3 1/2 yards of 39-inch material with 2 1/2 yards of ruffling.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Prince Has New Sport

The Prince of Wales has taken up a new sport—motorboating. He has ordered two new racing boats, but the manufacturer of the craft said the prince will not contest in open races but probably will organize competition among his flying and motor-ing friends.

Steamship Beothic Is Again Starting On Annual Trip To Posts In Arctic Archipelago

Work Up To Schedule

Churchill Will Be Ready For Grain Shipments This Fall

Preparations are going along satisfactorily for the trial shipments of grain this fall out of Churchill.

The ice-breaker N. B. McLean, left Quebec recently to take up her duties along the route and the work on the port facilities is well up to schedule.

No official announcement has yet been made as to the terms under which the test shipments carrying between 500,000 and 750,000 bushels of wheat will be made.

The understanding is, however, that because of the route being new, the insurance rates consequently high, and the trips being of a special nature as far as the ships participating are concerned, the charges per bushel in the ordinary course would be somewhat higher than via Montreal.

The government, it is expected, will be prepared to assume the additional costs for these shipments so that it will not cost the shipper any more than the Montreal route.

Consideration is being given, according to reports, as to who will be the shippers. Some companies with trademarked wheat products are said to have applied for permission to ship the first wheat by the port, but that the government does not take kindly to the trials being used to advertise any particular company. So far, according to reports here, none of the big shippers or the pools has made a decision in the matter.

The insurance rates announced from Regina, are the same as those made public by the Department of Marine in May. Hopes are expressed that after the trial shipments have been made and there is more tangible evidence to go before the shipping commission with, lower insurance rates will be obtained.

Good Canned Goods

Government Commercial Inspection Service Ensures Uniform Quality

Summer is the season in which the camper and tourist hold sway throughout the length and breadth of the land. It is also the time of the year when, perhaps more than at any other, canned goods are in demand.

It is during this season that the travelling and camping public come to realize the true worth to them of the commercial inspection service supervised by the Fruit Branch of the Dominion Department of Agriculture.

Under this service all canned products of field, orchard and farm are put up under close inspection, and each individual container in addition to conforming with a specific size must be clearly marked with the true quality of the product it contains.

There are three grades of quality defined by statute. These are—"Fancy" which is the highest grade and as nearly perfect as possible; "Choice" which, while not quite so perfect in appearance, is, as the term implies, a real good quality for the product; and

"Standard," for use where appearance is not the principal consideration, and which provides high food value and good flavour at little cost.

Another good thing about radio concerts is the lack of encores.

The S.S. Beothic carrying the Department of the Interior's 1931 expedition to the posts in the Arctic Archipelago will sail from North Sydney, Nova Scotia, on July 29. The date of this year's sailing is practically the same as last year and from experience it has proved the most satisfactory for the carrying out of the work of the patrol.

This year's expedition by officers of the North West Territories and Yukon Branch will be in charge of Major L. T. Burwash, an Arctic explorer of long and wide experience. Captain E. Falk will again be ship's master while Captain J. D. Morin will be the ice pilot. Dr. L. D. Livingstone, Medical Health Officer of the Branch will be ship's doctor on the voyage as far as Pangnirtung, where he will replace Dr. H. A. Stuart, who has completed a two year period among the natives of Baffin Island. Dr. Stuart will act as ship's doctor on the return voyage.

Inspector A. H. Joy and four constables of the Royal Canadian Mounted Police will accompany the expedition to effect changes in the personnel at the posts visited. Members of the force who have completed their tour of duty will be relieved. Two of the constables going North will remain at Pond Inlet at the northern end of Baffin Island; another will relieve one of the two stationed at Bache Peninsula, Ellesmere Island; and the other will replace a constable coming out from Lake Harbour, southern Baffin Island.

The same itinerary as last year will be followed, with the first call being made at Godhavn, Greenland. The "Beothic" will then be headed north along the Greenland coast for the farthest north post of Bache Peninsula on Ellesmere Island. By following this route much time is saved and the dangerous middle ice pack of Baffin Bay is avoided.

On the return trip the first stop will be made at Dundas Harbour, Devon Island. Although not yet definitely decided, it is possible that after completing the work at this post, the "Beothic" will return westward into Lancaster Sound to again attempt to reach Winter Harbour, Melville Island, to re-provision the cache established at that point by the 1908-09 expedition. Last year heavy ice conditions prevented the "Beothic" from reaching Winter Harbour.

If it is decided to make this patrol, caches will be laid down at Beechey Island off the southwest corner of Devon Island, and at Cape Cockburn, Bathurst Island. These will be for the use of Royal Canadian Mounted Police patrols and others travelling in the area.

Returning eastward to Baffin Bay, the ship will call at Pond Inlet, River Clyde, Pangnirtung, and Lake Harbour, Baffin Island; Chesterfield, Hudson Bay; and Port Burwell, Hudson Strait. The work of re-provisioning the posts and effecting changes in the personnel will then have been completed and the "Beothic" will turn southward for the final leg back to North Sydney.

B.C. Eggs For England

A shipment of three thousand cases of thirty dozen each of British Columbia eggs were shipped recently from New Westminster to London, England, by the British Columbia egg pool. This is the first export shipment of eggs since 1929. It will be the first of several shipments this year. Prices in the Old Country are said to be fair.

"How much is that canary?"
"Two pesetas."
"Can't you let me have it cheaper?"
"No, madam. That is factory price."—Buen Humor, Madrid.

PERFORMS UNUSUALLY WELL AT ROYAL AIR FORCE PAGEANT

The Royal Air Force Pageant produced annually by Britain's fighting air force, once again proved a great success and was a feast of thrills for the hundred thousand spectators. This picture shows the queer, fish-like "Pterofactyl," one of the quaint machines which took part in the Pageant. It has a speed of 110 miles an hour, carries three passengers, has no tail, and has the engine and propellers behind the pilot. One of its best qualities is that it is foolproof.

Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

Made in Canada

WORLD HAPPENINGS BRIEFLY TOLD

Eight Russian army officers were killed in an airplane accident near Alabino, 30 miles west of Moscow.

Edmonton land sales for the first quarter this year amounted to \$15,000 more than for the same period last year.

In Parliament Prime Minister Bennett said he did not expect to hold the position of Finance Minister at the next session.

Air mail contracts of which expiry notices on July 15 were issued by the post office department several weeks ago, have been extended until August 15.

Charles A. Lindbergh has been granted permission by the radio commission to operate a transmitter aboard his airplane on his projected flight to Japan.

Jute factories in Dundee, Scotland, are at work making a million sugar sacks. The sacks have been ordered by the government and are to be completed by December.

Organization of self-contained labor camps in the north of Canada was proposed in a resolution passed at Hamilton by the central branch of the Canadian Legion.

Announcement is made of the appointment of Lieut.-Gen. Arthur G. Wauchope to be high commissioner in Palestine, succeeding Sir John Chancellor, who recently resigned.

Appointment of H. E. Beresford as assistant director of surveys for Manitoba and Alfred Bedford Howell as chief game guardian have been officially announced by orders-in-council of the provincial government of Manitoba.

Strange News From Holy Land

\$2,000 Horse-Power Plant To Supply Electrical Energy In Biblical Towns

Here is strange news from the Holy Land. The first hydro-electric plant on the River Jordan south of the Sea of Galilee will soon be in operation. It was built partly by American capital and by next year its 32,000 horsepower plant will be supplying current to such Biblical towns as Jaffa, Haifa, Nazareth and Beersheba. Meanwhile the British are building a generating plant that will supply Jerusalem, Bethlehem and the surrounding region. Before long the mountain streams of Lebanon will be producing 51,000 horsepower. — World's Work.

A portable X-ray has been designed to enable a physician to learn at once the extent of a patient's injuries who has been hurt in an accident. The machine is carried to the scene in the ambulance.

SUNDAY SCHOOL LESSON

JULY 26

CHRISTIANITY SPREAD BY PERSECUTION

Golden Text: "Be thou faithful unto death, and I will give thee the crown of life."—Revelation 2:10.

Lesson: Acts 7:54 to 8:4; 11:19-21; 26:9-11; 1 Peter 4:12-19.

Devotional Reading: 1 Peter 1:3-9.

Explanations and Comments

The First Christian Martyr, 7:54-60; 8:2.—How challenging is the fortitude and grace of Stephen! In the strength of his vision of the heavens opened and of the Son of Man standing on the right hand of God, he could meet hatred and even death with a serene and courageous spirit. How his quiet demeanour contrasts with the ruthlessness and hatred of the mob, who grind their teeth in fury, scream, rush upon him, drag him without the city walls, and stone him.

When the stoning began, Stephen knelt to pray for power faithfully to endure to the end, or it may be as the stones hurtled upon him he was thrown to his knees and was in this position as he prayed. As the stones came thick and fast, like his Master he prayed for those who stoned him. "Lord, lay not this sin to their charge," he cried; do not weigh, place not this sin in Thy balance against them. At once, we think of Christ's prayer from the cross, "Father, forgive them, for they know not what they do."

"In our lives we need Stephen's steadfast courage, and his clear-eyed faith, and his heaven-piercing hope, and his God-like charity."

And when he had said this, he died, or, as it is beautifully expressed here, "he fell asleep." And devout men buried him, and made great lamentation over him, beating their breasts as a sign of their grief. It took courage to perform this kindly act for Stephen, even if most of the mad mob had departed to wreak their vengeance on the Church in Jerusalem.

Paul's Part In Stephen's Death, Acts 8:1.—When witnesses to the stoning of Stephen laid aside their flowing robes in order to have freer liberty of action, they left them in the care of a young man named Saul. He is first called Paul in Acts 13:9.

And Saul was consenting unto his death, approving all that was done. In Acts 22:20, Paul himself says, "And when the blood of Stephen, Thy witness, was shed, I also was standing by and consenting."

Persecution Begins and the Disciples Are Driven Beyond Jerusalem, Acts 8:1, 2.—Not content with Stephen's death, the mob began a city-wide persecution of the church which was in Jerusalem, and they were all scattered abroad throughout the regions of Judea and Samaria. Nearly six years had elapsed since Jesus commissioned His disciples to go and teach all nations, yet the church was still in Jerusalem, and not a single Gentile had been invited into the church.

Paul's Share In the Persecution, Acts 8:3.—"Consenting" today, standing by while others stoned Stephen, presently, when the attempt to destroy the church became a settled policy to be systematically carried out, Paul enlisted in the task and with fury and zeal entered into every home and dragging from it men and women committed them to prison.

The Scattered Christians Preach Everywhere, Acts 8:4.—The attempt to extinguish a great fire by kicking the embers apart resulted in a new fire blazing up where each ember fell. Hitherto the apostles had done the preaching. At the time of the appointment of the seven deacons, the apostles had declared "we will give ourselves continually to the ministry of the word." But all believers scattered by persecution went everywhere preaching the word. They probably did not declare the truth at first in any set form. Simpson says, they went "gossiping the gospel." As they sought shelter in the villages and towns, in explaining why they were there, they would tell the story of the gospel. This brought to the surface latent talent and those gifted began more formal preaching. In this way, the preaching of the truth ceased to be exclusively an apostolic function.

Communicating With Planets

Nicola Tesla Discovers Means Of Transmitting Energy From One Planet To Another

Nicola Tesla, the inventor, in an interview on his 75th birthday, said after years of research he had discovered a means of transmitting thousands of horsepower of energy from one planet to another, which he believes will open the way for interplanetary communication.

"I feel," he said, "that we are nearing a period when the human mind will perform greater wonders than ever before. This is due to the continuous refinement of means and methods of observations and the ever increasing delicacy of perception."

"Keep hold of the cord of laughter's bell,
And avoid the tones that jar;
The sound of a sigh doesn't carry well,
But the lilt of a laugh rings far."

Passing Of Trader Moberley

Was Link With the Very Early History Of the West

H. J. Moberley, better known as "Trader Moberley," is dead. Apparently in good health, Mr. Moberley was walking about a few days ago. The end came after a very brief illness, death being attributed to old age, Mr. Moberley being 96 years of age at the time of his death.

Known internationally for his book, "When Fur Was King," Mr. Moberley is believed to have been the only remaining commissioned officer of the old Hudson's Bay Company. He served the company from 1854, when he came west with Sir George Simpson, then governor of the company, till his retirement in 1894, when he was factor at Ile a la Crosse Post.

Born in Barrie, Ontario, Mr. Moberley was the son of a noted captain in the British navy. His father fought in the war of 1812. Prior to joining the Hudson's Bay Company, Mr. Moberley was employed by the famous British firm of Lloyds and in their service he visited Havana, Cuba, and St. Petersburg, Russia.

He commenced his service with the Hudson's Bay Company as clerk at Norway House under Chief Factor Rowland. Edmonton was his first post and afterwards he was moved to Rocky Mountain Post, later opening up Jasper House as a trading post for his company.

He also at one time was in charge of the posts at Fort Vermillion and Peace River, and established the Fort McMurray post in the early 70's. He was in charge of transports at Portage la Loche and carried despatches ahead of the Earl of Southesk in 1859 when the earl engaged in a hunting trip through Canada. Prior to taking charge of the Ile a la Crosse Post, the veteran trader was stationed at Stanley Mission on the Churchill in northern Saskatchewan.

Houses Good Sized City

Thousands Work Or Live In Empire State Building, New York

One of the biggest houses in the evergrowing world is the Empire State Building of New York. It is a huge structure of steel and bricks and is 86 storeys high. About 25,000 people live or work in it. There are 58 passenger lifts for the 86 storeys and three kinds of express lifts. Some of these lifts run at a speed of 15 miles an hour. The passenger goes up to the nearest stopping floor to his and then transfers to a slow lift which stops at every floor. Here again, however, he can make the last part of his journey on an escalator, of which there are nearly a hundred. Six lifts entirely for goods are always in busy use.

Film Actor: Look here, if he's going to throw me into the rapids, how am I going to get out?"

Director: "Oh, that's all right. You don't appear again!"—The London Opinion, England.

Recipes For This Week

(By Betty Barclay)

LEMON EGG-NOG

(Serves 1)

6 tablespoons milk.
½ cup cold water.
1 egg.
2 tablespoons sugar.
2 tablespoons lemon juice.
Grated nutmeg.
Combine milk, water, egg and sugar. Beat thoroughly, pour in lemon juice and mix vigorously. Serve in a large glass topped with a grating of nutmeg.

HONGKONG CHICKEN

2 cups cold cooked chicken, diced.
½ cup celery, diced.
2 onions, sliced.
½ cup crushed pineapple, drained.
1 teaspoon sugar.
Salt and pepper.
1 tablespoon butter.

Brown the celery and onions in the butter. Add the other ingredients. Heat well. Serve with fried noodles.

Manitoba Gold

Province Likely To Replace Yukon As Fourth Producer In Canada

Gold production in Manitoba for the first four months of the year exceeded the total output for 1930 by a substantial amount, and at the present rate of production the province is likely to replace the Yukon as the fourth producer in all Canada. Manitoba's gold output for the first four months of 1931 amounted to 35,928 ounces valued at \$739,540, or at a rate well in excess of two million dollars annually, as compared with an output of 23,189 ounces valued at \$479,359 for the whole of 1930.

Funds For Alberta

Settlement Of School Lands Case Is Satisfactory To Province

Close to ten million dollars in provincial assets, with nearly a half million a year in interest for three years, will be coming to Alberta as a result of the settlement of the school lands funds case. Hon. R. G. Reid, provincial treasurer, has been advised from Ottawa that the Dominion Government has issued a three-year debenture for \$9,564,569, bearing interest at 5 per cent. until July 1, 1934, payable half-yearly.

The debentures thus issued to Alberta's credit represents accumulated principal moneys from the sale of school lands since the organization of the province in 1905. All funds from this source have heretofore been handled by the Dominion, which has retained the principal and paid interest to the province. With the transfer of the Natural Resources from Dominion to Provincial control the school lands funds now pass to the province as part of the public domain.

Negotiations leading up to this settlement have been under way for a considerable time past. The conclusion now reached is regarded as highly advantageous to the province, and both Premier Brownlee and Treasurer Reid express themselves as well pleased with the outcome.

Worked In A Circle

Teacher—"Why are days longer in summer than in winter?"

Tommy—"Because the sun shines longer."

Teacher—"Yes, but why does the sun shine longer?"

Tommy—"Because the night is so much shorter."

PROPOSED PROBE OF QUESTION OF TRANSPORTATION

Ottawa, Ont. — Recommendations for appointment of a commission to consider the whole question of general transportation; present curtailment of projects entailing capital expenditure; salaries of Sir Henry Thornton to be treated as a "public document" and non-publication of the list of other salaries paid officials are recommended in an unanimous report of the special committee of the House of Commons considering the Canadian National Railway's report.

The document further recommends revision of the resolution of former C.N.R. directors for \$30,000 life annuity to Sir Henry Thornton on termination of services; consideration by directors of the whole question of salaries, allowances, disbursements, pensions and retirement provisions for executive officers. The abandonment of Canadian Government Merchant Marine and the making of arrangements with other shipping companies so that external trade of Canada will not be jeopardized are also proposed.

The report condemns a practice that it declares has grown up under which the National Railways are chargeable with large amounts for payment for social entertainment and other activities of officials on other than official business.

Further recommendations include: Continuation of payments under the Maritime Freight Rates act; thorough audit by independent auditor of system accounts from time to time; action for elimination of loss on Vancouver-Seattle-Victoria steamship triangular service; approval of bill to authorize expenditures made and indebtedness incurred during 1931, and approval of measure to authorize the guarantee of securities to be issued under the Canadian National Railways Financial Act, 1931.

Want Potato Probe

Inquiry Into Conditions Under Which B.C. Potatoes Were Marketed On Prairies

Victoria, B.C.—Federal inquiry into conditions under which British Columbia early potatoes were marketed at prairie points, at widely divergent prices far above the return received by the interior and coast producers was asked by Hon. William Atkinson, acting on the complaint of the Vernon Fruit Union and other B.C. growers.

The provincial minister of agriculture wired to Mr. Gornall, chief of markets extension branch of the federal department, citing the "apparent unwarranted spread" between what producers of the province received for their early potatoes, and the wholesale prices as recorded in the bureau's report No. 3, dated July 3, for quotations at many prairie points.

Post Office Deficit

Due To the General Depression Says Postmaster-General

Ottawa, Ont.—The post office deficit was due to the general conditions in the country, Hon. Arthur Sauve, postmaster-general, told the House of Commons when, in committee of supply they considered the estimates of his department. The vote of \$11,492,899 for salaries, etc., was passed. For the fiscal year just closed the deficit of the department would approximate \$5,293,000, being the difference between expenditures of \$36,293,680, and revenues totalling in the neighborhood of \$31,000,000.

Advocate Group Insurance

Victoria, B.C.—Group insurance for all civil servants of Canada to be embraced in a national policy, will be placed before the annual all Canada Civil Service Convention at Regina in September, by the Victoria and Vancouver branches, it was made clear at a meeting here of the Victoria local of the Amalgamated Civil Servants of Canada.

Government Grain Elevator

The Dominion Government grain elevator, under construction at Lethbridge, is expected to be ready for business by September 1st, this year.

W. N. U. 1899

Government Buying Wheat

To Be Ground Into Flour For Drought Areas In West

Ottawa, Ont.—The Dominion Government has decided to direct the purchase of 2,000,000 bushels of wheat to be ground into 450,000 barrels of flour which will be available at low price, with bran and shorts, in drouth areas in western Canada, Premier Bennett announced in the House of Commons.

"It is not improbable," the prime minister stated, "that members, especially those who reside in western Canada, may be interested in knowing that the government has concluded in view of the situation that obtains, to direct the purchase of 2,000,000 bushels of wheat, which will be ground into flour by the mills of the west, thereby enabling the municipalities and those requiring assistance to obtain flour at a very reasonable price and where distribution has to be made we will be in a position to do so without delay."

"That will produce 450,000 barrels of flour and the bran and shorts that will remain will also be available if desired. I mention this at once in order that members who may be receiving communications from the west may be able to reassure those who are directly affected by the drouth conditions in their provinces."

To Commemorate New Treaty With Australia

B.C. Will Send Giant Douglas Fir Flag Pole To Canberra

Victoria, B.C.—Jubilant at the completion of the new Canadian-Australian preferential trade treaty, Premier Tolmie has ordered that this province's gift to Australia of a giant Douglas fir flag-pole be sent to Canberra immediately.

Government foresters will search in the woods of this province for a tree of perfect shape and great height and will supervise its cutting and seasoning. Standing in the grounds of the Australian capital, with a suitable bronze tablet at its base, the pole will commemorate the successful negotiation of the new treaty, which Premier Tolmie described as the best business this province has received in years.

Newspaper Man Honored

J. F. Burd, Of Vancouver Province, Presented With Oil Painting

Vancouver, B.C.—Presentation of an oil painting of himself was recently made to J. F. Burd, managing director of the Vancouver Daily Province, by executives of the newspaper who had been associated with the Province for 20 years or longer.

Lured to a dinner party on the pretext that the function was to welcome John Russell, business manager, to the 20-year circle, Mr. Burd was surprised to learn that he was the guest of honor.

Presentation of the painting was made by Roy W. Brown, editor. Others present were Ronald Kenyon, managing editor; W. C. Russell, advertising manager; F. E. Henderson, circulation manager; D. A. McGregor, editorial writer, and John W. Wright, production manager.

Hospital Commission

Proposed Network Of Cottage Hospitals and Clinics For Manitoba

Winnipeg, Man.—Establishment of a provincial hospital commission with wide powers and division of the province into hospital zones was held to be essential by a select committee of the Manitoba legislature which met here. The committee was appointed at the last session of the House to work out a means of "more equitably distributing the cost of illness."

Hospitals are unevenly distributed in the province, the committee decided. Members agreed that a network of cottage hospitals and clinics was necessary to supplement the municipal hospitals. The committee will meet here again in August.

Ore Contains Silver

Edmonton, Alberta.—The mystery ore body discovered by T. G. Donovan, Detroit geophysicist, at Great Bear Lake, contains silver, it has been announced. The sample tested by University of Alberta experts was declared to be of almost unbelievable richness, assaying \$1,035.55 to the ton.

FOR UNEMPLOYMENT RELIEF

Hon. J. A. Merkley, Minister of Railways, Labor and Industries in the Saskatchewan Cabinet, who seeks \$18,000,000 from the Dominion Government to take care of the relief and unemployment in Saskatchewan this year.

Premier Introduces Bill For Pensions

Resolution Provides For Increased Contribution By Federal Government

Ottawa, Ont.—A resolution providing for the increase from 50 to 75 per cent. in the federal contribution to old age pensions has been placed on the order paper of the House of Commons by Rt. Hon. R. B. Bennett, Prime Minister. The resolution calls for an amendment to the Old Age Pensions Act. It reads as follows:

"Resolved, that it is expedient to amend the Old Age Pensions Act by increasing the amount of the payment to the provinces for old age pensions from one-half to 75 per cent. of the net sum paid out during the preceding quarter by such province for pensions, and to provide for the examination and audit of expenditures in the province and the accounts relating thereto."

The increase in federal payment for old age pensions was announced some time ago. This legislation implements that announcement.

Trans-Canada Flight

First Non-Stop Flight From Halifax To Vancouver To Be Attempted In August

Vancouver, B.C.—The first non-stop flight across Canada, from Halifax to Vancouver, will be attempted August 14 by J. Williams, of Ottawa, in the course of a triangle flight, Vancouver, Mexico City and back to Halifax, according to a telegram received by Airport Manager William Templeton.

Williams will fly a Lockheed Vega monoplane, capable of a speed of 170 miles per hour. He will leave Halifax at dawn and expects to reach Vancouver about 7 or 8 o'clock in the evening. He will refuel here and take off immediately for Mexico City, hopping on again from that point for Halifax. He hopes to make the 9,000 mile round trip in three days.

Riding Freight Trains

Railway Officials Take Action To Put a Stop To Free Trips

Vancouver, B.C.—Frequent deaths among transients getting free trips on freight trains, has been responsible for a drive to end this form of travel, according to railway officials. It is unofficially stated that there have been scores of such deaths in the past few months. Sudden shifting of lumber loads and many other eventualities contribute to the toll among the brake rod riders.

This week Canadian Pacific Railway police, co-operating with other forces, started a campaign and there have been 20 arrests in various parts of British Columbia for this kind of trespassing.

Another object is to stop indiscriminate movement of unemployed from one part of the country to the other. Railway officials state, too, that many of the travellers are able to pay fare.

Trainmen have been used to an average number of casual tramps seeking free transportation, but the new tide of traffic has swelled to great proportions and has become unwieldy with impedimenta. In fact, so much baggage has been piled on top of freight cars that brakemen have difficulty, it is said, in making their way along the catwalks.

Pleased With Treaty

Australia Satisfied With Terms Of Recent Trade Pact

Melbourne, Australia.—General satisfaction is being expressed here at the terms of the new Australia-Canadian trade treaty.

It is stated the Canadian concession for Australian wines and citrus fruits will stimulate exports to Canada from this country, and provide a valuable market which will give Australia practically a monopoly in currants and raisins.

"Butter exporters have every reason to be satisfied," said the chairman of the Victorian section of the Australian dairy produce export board.

The S.S. Canadian Constructor leaves for Montreal at the end of August and is expected to take more than 200,000 cases of dried fruits. Every effort is being made to load this ship with a representative Australian cargo.

British Boys Entering Canadian Universities

At Least Twenty-One Are Coming This Year

Montreal, Que.—Practical results of the visit to this country last spring of a group of British public school headmasters is seen in the announcement that at least 21 British public school boys will come to Canada this year to enter Canadian universities. McGill University will have 12 of the boys, Queen's University, four, University of Toronto, three, and one each will go to Guelph and the University of British Columbia.

F. W. W. Crump, Taunton, will study chemistry at British Columbia.

Mounties' Monument

Pioneer days in the Canadian West will be re-called on August 1, when notables from all parts of British Columbia and the Prairies gather at Fort Steele, B.C., on the Columbia Valley line of the Canadian Pacific Railway, to attend the formal unveiling of a cairn erected by the Historic Sites and Monuments Board, to commemorate the first Royal North West Mounted Police Fort in British Columbia. It was built in 1887 by Superintendent "Sam" Steele, (afterwards Major-General Sir Samuel Benfield Steele, K.C.M.G., C.B., M.V.O.), with Inspectors Z. T. Wood and C. F. A. Huot, Surgeon F. H. Powell and the men of "D" Division, and was an important factor in securing and maintaining the peace of the newly developed territory. The history of the Mounties is an epic and their work in connection with the construction of the line of the Canadian Pacific Railway to the Coast, is one of its most stirring pages.

MANITOBA PLANS TO RELIEVE THE FEED SITUATION

Winnipeg, Man.—Reduction of permit dues on hay cut on crown lands from \$1 to 25 cents per ton and measures of co-operation with Saskatchewan will form part of Manitoba government's policy regarding the feed situation. In making this announcement Premier John Bracken stated the feed situation has shown "decided improvement" during the past three weeks.

The premier said there was "much greater promise" at present for fall pasture and winter feed, "but there is still a shortage in some districts." On crown lands, he said, there were 25,000 tons over and above the amount already permitted to resident settlers. As a result of a conference with heads of railway companies, hay will be transported to needy areas at two-thirds of the ordinary freight rate.

The lower rate was secured on the understanding the government would become responsible for the payment of reduced charges. "It is now proposed," Premier Bracken continued, "that the provincial government, in conjunction with the Dominion Government and municipalities, absorb the two-thirds rate, making hay available in drouth areas free of transportation costs except as may be charged farmers by municipalities."

Premier Bracken explained that this move was purely a relief measure to maintain the livestock industry and he thought it may occur that municipalities in parts of the southwest of Manitoba will not have to bear any expense. As a measure of relief to unemployed in the Carrot River Valley of Manitoba, the government had decided to put up 1,000 tons of hay at once and invite both Saskatchewan and Dominion governments to contract for their requirements for drouth areas of Saskatchewan.

Request For Wheat Board Is Refused

Prairie Premiers Advised Of Decision Reached By Government

Winnipeg, Man.—The Dominion Government has turned down the request of the prairie premiers for a wheat board. Premier John Bracken of Manitoba, disclosed that the premiers had received a letter from Premier R. B. Bennett advising that the Canadian Government does not see its way clear to set up the proposed prairie-wide board.

The letter from Mr. Bennett, Mr. Bracken admitted on questioning, made the suggestion of an inter-provincial body "somewhat similar" to that forecast in reports published here. It had been reported that the Ottawa suggestion was for a commission, headed by John I. McFarland, head of the Pools' Central Selling Agency, to control the Pools' elevator systems and to market their grain.

Deportation Figures

3,099 Britishers Departed From Canada In Ten Months

Ottawa, Ont.—Deportations from Canada from August 1, 1930, to May 31, 1931, totalled 4,137. Hon. Wesley A. Gordon, Minister of Immigration, told the House of Commons. The House was in committee of supply considering an item of \$1,905,000 for salaries and contingencies of the department. From April 1, 1930, to the present, deportations had amounted to 4,976, the minister said, of which 3,099 were British, 279 United States and the remainder foreigners from countries other than the United States.

The department was not now making grants to immigration societies, the minister said. The vote was divided between \$1,055,000 for salaries for the outside service, and \$850,000 contingencies.

Bill Was Defeated

Ottawa, Ont.—A bill to amend the Immigration Act so that no deportation could be carried out of a person who had lived in Canada for 10 years, was declared lost on second reading in the House of Commons when no one rose to address the House.

DEBT CANCELLATION

There is a general business depression all over the world at the present time, but conditions are bound to change before long and everything will be on the upward trend. Experts say that it will be a few years before business gets back to normal again, but there should be no reason for this. The only reason in which it would take any length of time to remedy things would be on account of the old debts that are clinging to our shoulders and the debtors that are owing us cannot pay. Taking things as they come it may be seen that if Johnny Jones would pay what he owes, you would be able to pay the next man and so on. Now if we could wipe these old debts off during the time of depression, when the upturn came we would be able to go ahead and the world would prosper. On the other hand, if these old debts were wiped out prosperity would be just around the corner.

The scheme in view is a credit note or cheque that someone would issue for a certain amount, say \$5, and this credit note would be only good to pay off a debt or a portion thereof, but no actual money would be paid out (for we haven't got it). If a man owed you five dollars and you owed someone else, and being an honest man you would want to pay your debts, you could take this note or cheque for your debt and turn around and give it to someone that you owed money to, and so on down the line. Finally, to cash in the cheque, when someone had taken the note and owed the first issuer, he could pay him with the note or cheque, and all would be square. While this note was going the rounds it would probably clear off thousands of dollars of debt before the issuer got it back.

A number of these cheques or notes could be issued and considerable debt could be paid off in this way. The only stipulation would be that the person receiving this note must also owe at least a similar amount and that he must pay a debt, and also that the note must be paid to someone in the town or district so that it could come back and clear off our own debts instead of others. Such a system of debt cancellation could be started by anyone who owed five dollars and who had at least five dollars owing to them. The Board of Trade could take up the matter successfully. Even our local farm unions might have a hand in the scheme. The system is simple, but it would have to have the support of the town and community and the people taking and receiving the note would have to be honest and willing to pay their debts or the cheque would be of no value to them, because it would not be redeemable in cash. It would only be good to pay a debt, and all persons receiving the note would have to issue a receipt to protect the man that is paying.

INDIVIDUAL CANNOT BEAR BURDEN

The following is an editorial that appeared in the Hanna Herald some time ago and it should make good reading material for some of our subscribers:

"In the Small Debts court a few days ago, eleven cases were heard, all originating from one local business concern. The same business man produced a list bearing the names of nearly one hundred persons who had made purchases, but who had failed to pay their bills. Furthermore, a number of these debtors had ignored their accounts for more than a year. The only alternative was to seek redress through the court. And, in every instance, the debtor paid. In every one of the eleven cases for which summonses were issued, the debtor issued a check and handed over currency in payment. Which goes to prove that the majority of these small debt cases the debtor is able to pay, if he would but discharge his obligation to the creditor.

The failure to pay small debts is found to be largely the result of neglect. When the business man is forced to take court action, the majority of cases result in prompt settlement, showing that the debtors could pay, if they wished to.

During these times if financial stress it is unfair to expect the business man to carry accounts receivable over indefinite periods. Restaurants, grocers and other provisioners cannot be expected to accept the responsibility of feeding the individual who cannot finance his own purchases. Such responsibility falls upon the community as a whole and not upon the individual business house."

Golf Is Golf From Coast To Coast

Golf has assumed such important proportions in the make-up of modern everyday life that it constitutes a very real phase of the activities of those who serve the public. The Canadian Pacific Railway is such a one and its train services to golf courses and established arrangements for guests at its many hotels to enjoy the game are the practical interpretation of its desire to maintain the traditions of 50 years of meeting the requirements of the Canadian people

THE PICTURES

(1) Looking from the fairway at the first tee, pavilion and Banff Springs Hotel, at Banff, Alta. The Spray River (left) forms a sporty water-hazard. This course is a mile above sea-level in the heart of the beautiful Rocky Mountains. (2) On the famous course at St. Andrews-by-the-Sea, N.B. (3) The 13th tee at the Oak Bay Golf Club, Victoria, B.C. Note the periscope to allow players a glimpse of what they have to cope with. Golf is played the year round on this course.

and their visitors. From coast to coast, excellent courses are available and where the company does not operate its own links, playing privileges at first-class clubs are granted. In the Maritimes, there are courses at St. Andrews-by-the-Sea, N.B.; Kentville, N.S.; Digby, N.S.; and Yarmouth, N.S. all in connection with the company's hotels. Quebec City has two fine courses, one club dating back to 1874. Montreal has the oldest club in Canada, the Royal Montreal, founded in 1873, which today boasts two championship 18-hole courses. Other Clubs are numerous and good. Toronto, too has many excellent links, including the Royal York Golf Club, where guests at the Royal York Hotel have playing privileges. Ontario abounds in courses, all along the Canadian Pacific's lines. Bungalow camps at French River and Kenora (Lake of the Woods) have sporty 9-hole courses for their patrons. Throughout the Prairie Provinces, golf is available at all the larger centres, while the Banff Springs Hotel Golf course is among the best in the country, in settings of unrivalled mountain scenery. It is the Mecca for golfers from all over Canada and the United States, to say nothing of the numerous overseas visitors who play it each summer. Vancouver and Victoria offer ready hospitality, the latter standing unique among Canadian golf centres, in that the game is played throughout the 12 months of the year, the annual mid-winter tournament for the E. W. Beatty Challenge Cup, run by the Canadian Pacific Railway, being an outstanding feature of the golf calendar.

CHAPTER XXIII.—Continued

He stopped abruptly, while Angela cried, her voice sounding unnatural, like some piece of machinery long unused: "What does that mean?"

"That we go with the drift."

Myer sank down beside his wife, and taking the child into his arms, rested his cheek tenderly against her hair.

Nick looked away, thinking: "I shall never hold Gay in my arms." His throat ached intolerably, and not caring who might see, he buried his face in his arms.

Yet, after what seemed an eternity of misery, his heart lightened. He had been right. The sea was calmer—even there in the cabin it was evident. Thank God the propeller had held out through the worst violence. "Perhaps now . . . if no fresh gale swept them."

He dared not hope; yet with the coming of day the wind died, as if spent by its own fury, and the rain became a steady downpour that fell like oil upon the troubled waters. After a long, almost breathless interval Nick looked at the Colonel, his eyes asking a question, and from the Colonel to Myer, who had risen unsteadily to his feet. The boat lurched, and he stumbled—fell—but sprang up, and without a word went out, followed by Nick. When he returned he said, his voice harsh with feeling:

"The captain thinks the worst is over. If we're far enough out so that we strike no land until the water is less disturbed; and if we have the luck to drift into some safe harbor. . . ."

He left the sentence unfinished, while across the cabin his wife's eyes met his.

The Colonel said: "Thank God!" and his voice shook.

Angela sank back weakly, putting a hand over her trembling mouth; while from Amy Meyer, clasping her child closer, came a dry sob.

All day they drifted; yet, overcome with exhaustion, they also slept in snatches, and the hours passed, till, almost reluctantly, it seemed, the rain lessened—then ceased to fall. Slowly the clouds lifted, revealing a wild waste of restless sea. The day brightened; the waters grew more calm; and despite the fact that they were derelicts, drifting perhaps toward some perilous, hidden reef, hope sang in their hearts.

It was at dawn next day that Nick awakened suddenly from a heavy sleep. It seemed to him that the

boat shuddered, and then stood still. In an instant he was on deck; but the Myers and Colonel Nowell were there before him, gazing in rapture at a wooded island a half mile off. The "Sea Bird" had struck upon the bar, which held it in a tenacious grip from which it was never to be dislodged; but already the men were preparing to lower a boat.

Nobody spoke. No one seemed able to speak. The Colonel was plainly too moved for words. Amy was thinking with the exaltation of one reprieved: "My little Marjorie will live! She is going to live!"

Nick stood in a sort of trance. After that first enraptured moment he did not see the island, nor the palms, nor the dancing waves that looked angry no longer in the morning sunlight. He saw dimly, through tears of which he was unashamed, a lithe young figure clad in a khaki middie, a crimson tam upon her head, a crimson sweater on her arm, a bundle on a stick across her shoulder. . . .

It was Angela who broke in upon this vision. She approached quietly, the only member of the party who had thought of raiment. Her gown rivaled the blueness of the sea, and of her own eyes.

"Well, that looks something like!" Her voice jarred on the atmosphere like a discordant note. "I suppose we're in some horribly out of the way spot. Why on earth couldn't we have struck a place where we'd be picked up within a week? I detest camping."

The spell that had held them all was broken. Everyone looked at her in blank amazement, even the captain who was approaching to speak to Myer. Their eyes were shocked—indignant, but Angela was unaware. She said, addressing the captain, in a manner that was a bit arrogant: "Look here, Captain, where are we anyway? How long are we likely to stay in this God-forsaken spot?"

The captain's eyes met hers, and at something in their depths her own eyes dropped. He had followed the sea for many years—encountered danger without flinching, many times; but not often had he been called upon to live through hours like those that had just passed. He was a plain man, blunt of speech perhaps, but deeply religious at heart, as are most men who have met death fact to face. His eyes left Angela's to drink of the scene before them: the rippling water—the clear sky—the fairy island set like a jewel amid the blue.

"God-forsaken?" he said.

His eyes came back to hers and hardened like steel.

"But for His goodness, Madam," he added grimly, "you would now be food for the sharks. You should be on your knees."

CHAPTER XXIV.

Hallday had been gone three weeks. "Remember," he said to Simeon in parting, "that bad news travels faster than good. If you hear nothing it will be because there is nothing to hear. Should I get any sort of clue I will send a message. I shall stop everywhere, inquire wherever there is anyone to inquire of, and explore every island. I haven't the dimmest idea how long it will take; but I shall leave nothing undone. I know you will do your best to keep up Mrs. Hastings' courage; and I know, too, how much harder a task you have before you than have I."

Three weeks, and no word of any kind.

"It seems three years," said Gay; then closed her lips as if ashamed to have admitted even as much as that. There was a fragility in her face these days that frightened Simeon; a look of waiting that was sadder than any tears. The doctor saw it, too.

"Gay, dear child," he said on leaving her one day, "you are going through a terrible experience. Tears won't hurt, you know. Sometimes they heal. Why don't you cry?"

She smiled at him wistfully.

"I'm afraid to. When I cry, Dr. Bennett, I cry so dreadfully. After the baby comes, if—if there's no news of Nick I—I'll let myself go. I don't dare to now. It would make me ill. You've never seen me cry, Dr. Bennett, or you'd understand."

"But I could cry myself when I look at her," the doctor confessed to Mary Maxwell that afternoon. "She's the bravest woman I ever saw, and I've seen many. To hear her talk so calmly about their father to those little boys—as if he had—well, just stepped out for a moment and would be right back—God! Mary, it hurts. I don't see how old Simeon Bartlett stands it."

"He stands it because he's something of a hero; but he has aged shockingly. Is there anything more that we can do for them?"

He answered with a hopeless gesture.

"You can drop in every day and appear cheerful. I wish Gay had a mother; but there! I guess you're not a bad substitute, Mary Maxwell."

Mary smiled, and said: "I've sent for Janey. I think it will do Gay good to see her. They're such close friends, and Janey's always so optimistic. She's like a breath of mountain air. She wrote me the other day that she 'felt in her bones' that Nick was coming back; and if she can instill that feeling into Gay it may help."

"Good!" said the doctor heartily. "Janey's a tonic. I always said she grinned at me when she was born!"

It was about a week after this conversation took place, that, thousands of miles away on a coral-tipped island, Nick faced one of the blackest moments of his life. He had gone for a tramp. Angela complained that he was always tramping.

"Why not?" he answered. "Someone must patrol this island. Who knows from what side a boat might appear at any time?"

"You might at least ask for company," she pouted.

"I don't want company," he replied bluntly. He was a little weary of the "injured innocence" appeal. "Besides, I can't take you because you'd get tired by half a mile of it, and I'm going farther. I think that point of land off to the south would be a good place to build a signal fire."

"But you've already built dozens! When you're not building them you're making plans for starting out with the captain in a small boat. It's absurd. If any lives are to be risked it should be the lives of those common machinists. Besides, if the captain were any good he'd know where we are."

"Look here," said Nick a bit petulantly, "haven't I explained a dozen times that a man might live on the high seas all his life, and still know very little about these islands? They're off the main line of ocean travel. He knows our latitude and longitude, of course, but his map doesn't show all the smaller islands, and we're not sure how far off the next one may be. Our food won't last forever, Angela, though waters' a far more serious problem. You sneer at the captain because he's not your sort—"

"Is he your sort?" she broke in angrily.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you knew as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Depth Tester For Aviators

Also Records Approach Of Hills In Misty Weather

A depth-testing device which shows how much water is below a ship at sea by a dial on the bridge has been described in a London newspaper. Now comes news of a similar device for aeroplanes which not only shows by the hand on a dial the height of the aircraft in the air, but the approach of hills and mountains in misty weather. It is called a sonic, or sounding altimeter, and besides indicating the height on a dial it emits a shrill whistle.

Aching CORNS STOP HURTING

Just a drop or two of Putnam's Corn Extractor, and the pain away. Relief is almost instant. Removing corns with "Putnam's" is so easy, so sure, so painless—sands use this wonderful . . . and say it is the best. . . . any longer, use Putnam's . . . tractor, the one sure relief for sore corns. So! at every drug store, 35c.

PUTNAM'S

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: After many adventures flying over China, Captain Jimmy is forced to land behind the enemy's lines. He plans a raid on the military camp to secure gasoline and oil.

While Lieutenant Stone threw the military camp into an uproar, I whistled softly to Scottie and groped my way through the darkness toward the big, imposing tent.

Quietly I slipped under the canvas, and felt my way quietly around the sides. As my eyes grew more used to the darkness, I could see the outline of a large cot on which someone lay sleeping soundly. Scarcely daring to breathe I crept slowly forward. Then before the surprised Chinese could offer any resistance, I grabbed him and secured his arms behind his back.

Under his pillow I discovered no less than two pistols and a knife. The knife I threw away. One pistol I pocketed, with the other I induced him to follow me. Wrapped in a blanket, I shoved my captive under the tent wall, and marched him along to where the horses were held by Fu Sau.

Once we had put some distance between ourselves and the camp, we questioned our prisoner. To our amazement, we discovered that we had secured no less a personage than General Fong as a hostage.

"Tell him," I said, "that as soon as it becomes light, he'll write me an order for 150 gallons of gasoline, twenty gallons of oil and a supply of food, and if he doesn't write the order pronto, I'll take him apart by hand to see what makes him tick."

The interpreter translated my message. "General say he no can do," said Fu Hau. "He say you surrender now and he'll be velly easy with you."

I scowled as fiercely as I could. The

poor Chinese looked so funny in his night clothes and blanket, yet he just could not forget his rank of General. Pulling out my pistols I made a number of horrible faces, expressing the dozens of dreadful things that would certainly happen to him if he continued to refuse our request.

Being a sensible man, and a General he decided to yield handsomely since I had the upper hand.

"He say, 'Velly glad to do such little favor for fine gentlemen.'"

At daybreak I rode out to the camp with the General's written order in my pocket, and his gold signet ring on my finger, as proof of my authority.

The camp was astir and immediately we were sighted a group of mounted men galloped out and surrounded us. In a loud and commanding tone I insisted that we be taken at once to the commanding officer. To him I showed the ring and made the demands for gas, oil and food.

We got plenty of immediate action. Burros were loaded with gas, oil and food and we set out for camp. Leading off in a round about way, it was over four hours before we shook off the last spying soldier and finally reached the "plane."

For us, the timed food was a real feast, and even the General seemed to enjoy it. Breakfast over, we put him to work emptying cans of gasoline into the "plane" and he proved to be about average Chinese labor at that job.

Then we took off on a level spot in back of the trees and our last sight of General Fong was seeing him walking wearily back to his camp.

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

Little Helps For This Week

"Seekest thou great things? Seek them not."—Jeremiah xiv. 5.

Daily struggling, though unloved and lonely.

Every day a rich reward will give; Thou wilt find by hearty striving only, And truly loving, thou canst truly live.

—Harriet Winslow.

We need not go through the days of our life seeking our work. God places it within our hands. And yet how often do we make the mistake of asking for a life which shall, in its form and outward course, be more spiritual and divine than that which we are obliged to live. Million occasions will come in the ordinary paths of life, in your houses and by your firesides, wherein you may act as nobly as if all your lives you visited beds of sickness and pain,—occasions varying every hour, in which you may restrain your passions, subdue your hearts to gentleness and patience, resign your own interests for another's advantage, speak words of kindness and wisdom, raise the fallen, cheer the fainting in spirit, and soften or assuage, the bitterness and weariness of the mortal lot. These acts are written in the secret book of the great account.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Coal Survey

Province Of Saskatchewan Making Survey Of Coal and Clay Deposits

Under instructions from the Provincial Department of Railways, Labor and Industries, a survey of coal and clay deposits lying north of the Saskatchewan River is being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hastings, developing engineer. For some time these deposits have been known to exist but they have never been thoroughly investigated as to their quantity or commercial value.

What's that stuff on those sheep? Farmer—Wool. Suspicious Old Lady—I'd bet it's half cotton.

THE RHYMING OPTIMIST

By Aline Michaelis

YESTERDAY

What is yesterday, my Dear?

Just a shadow leaving;
Worth no tribute of a tear,
Worth no moments grieving.

Brave hearts thrust aside the past,
Gauds or gold it brought them;
Flinging all away at last
Save the truth it taught them.

What is yesterday, my Sweet?
Just an echo going
Down a bare, untrodden street
Where no life is flowing.

Leave it as a brave heart must
With no thought of sorrow;
Putting all your faith and trust
In a glad tomorrow.

Oslo, Norway, is to have skyscrapers.

More Truth Than Poetry

It's a singular thing that in the gathering of business men, whose wives are taking in washing, held usually in the local garage, the men who talk the loudest and seem to know the most about money are the ones who never have any. They will readily settle to their own satisfaction such world wide questions as excessive armaments, the fluctuating value of silver, and the unemployment problem. Some of their solutions at that sound about as reasonable as those put forward by many of the wizards of finance, when they occasionally hold a meeting and debate the same questions.

The only time silver fluctuates in value is when a dime on the church plate looms up like a half dollar, or when the same dime handed to a hotel bellhop is regarded as something too small to even sneer at. The real wizards of finance today are out on the farms, they're not holding meetings, or waving the red flag, they're not particularly worried about unemployment because they have plenty to do, in many cases they're the most cheerful ones of the lot. They have undoubtedly derived considerable amusement from reports of meetings called to consider farm relief. It must have been as good as the comic picture when they listened in at the radio, to hear some wise statesman who wouldn't know a hill of beans from a sunflower, discourse on farm problems. These farmer's aren't worrying half as much as many city people.

Out of all the discussions on and about finance, conducted by the "wizards," but little good came. It remained for the nations, led by Mr. Hoover, to really do something. When a year's moratorium of war debts was announced, then things immediately began to jump like a jack rabbit with fleas. The business world was waiting for some such manifestation; stocks and bonds, the very next day increased in value by several millions. The Canadian Pacific Railroad was worth several millions more that day than it was the day before. They hadn't any more cars, they hadn't acquired any more miles of track. It was just the improved state of mind of the people that made them think the road was worth more. The improved state of mind was the secret of the whole thing. The washer-women who were supporting their husbands rubbed a little harder, the husbands talked a little louder, and to the farmer the milk striking the bottom of the pail sounded more cheerful. So it went all down the line, just because Germany was given a year's breathing spell.

There is more money in the country than ever before, the banks have so much they're using it for wall paper, they have been hanging on to every dollar like a puppy to a root. The money wasn't being passed around, one dollar changing hands often enough will do a hundred dollars worth of business, but one dollar hid in a sock won't do any business. It only depends on all of us to cultivate a state of mind that will coax the dollar out of the sock and set it at work in the channels of trade. It's just a state of mind, but thanks be to the farmers and wash women it's turning. Canada has 3,600,000 square miles of opportunity.—De Laval Bulletin.
